SUMMARY

Aspiring Full Stack Developer with a strong foundation in **Python, JavaScript, SQL, React, and Flask**. Experienced in developing responsive web applications and AR-based projects through internships and academic work. Enthusiastic about learning new technologies, solving real-world problems, and contributing to dynamic teams

EDUCATION

Sudharshan Engineering College| Pudukkottai
Bachelor of Technology - Artificial Intelligence and Data Science; CGPA: 7.62
June 2021- June 2025

WORK EXPERIENCE

BY8LABS|Pudukkottai | intern
March 2025-August 2025

- Built scalable web applications using React (front-end) and Flask (back-end).
- Implemented REST APIs and integrated MongoDB for data management.
- Worked in an Agile environment, participating in code reviews and sprint planning.

Web Development Intern | internPe
June 2024-July 2024

- Developed responsive and interactive web pages using HTML, CSS, and JavaScript.
- Designed reusable UI components to improve development efficiency.
- Ensured cross-browser compatibility and deployed projects on GitHub Pages.

PROJECTS

Fake News Detection Using Large Language Models (LLMs):
June 2025

- Fine-tuned a pre-trained LLM (GPT/BERT) with custom datasets to accurately classify fake news.
- Built a data-cleaning and preprocessing pipeline to improve detection precision and recall.
- Deployed a real-time prediction API using Flask for scalable web integration.

3D Augmented Rality Filter with Meta Spark:
October 2024

- Designed custom 3D assets and animations to create an interactive AR filter.
- Implemented face-tracking triggers and gesture recognition for dynamic effects.
- Created an interactive 3D AR filter using Meta Spark Studio for social media platforms.

Responsive Pricing Cards Web:
August 2025

- Built a **responsive pricing layout** with **HTML, CSS, and JavaScript**.
- Added **hover effects, plan selection, and signup redirection** for a subscription model.
- Optimized textures and models for smooth cross-device performance on Instagram

SKILLS SUMMARY

- Languages:** Python, JavaScript
- Frontend:** HTML, CSS, Tailwind CSS, Bootstrap, React
- Backend:** Flask (Web Development)
- Databases:** SQL, MongoDB
- Tools:** GitHub, Postman – API testing, XAMPP, Thunder Client
- Platforms:** Visual Studio Code, Meta Spark (AR Development)
- Soft Skills:** Problem-solving and Positive attitude

CERTIFICATES

- Python Full-Stack Development -- (BY8LABS)**
March 2025 – August 2025
- Oracle Cloud Computing -- (EduVate)**
April 2024
- AWS Academy Graduate -- (AWS Academy Cloud Foundations)**
October 2023
- HTML and CSS – (LetsUpgrade)**
November 2023
